8.

Inclusive Mobility. A Guide to Best Practice on Access to Pedestrian and Transport Infrastructure(publishing.service.gov.uk), including access widths and placement of articles and matters for businesses to consider, including the below.

Width and height clearance Footways and footpaths should be made as wide as is practicable, but under normal circumstances, a width of 2000mm is the minimum that should be provided, as this allows enough space for two wheelchair users to pass, even if they are using larger electric mobility scooters. If this is not feasible due to physical constraints, then a minimum width of 1500mm could be regarded as the minimum acceptable under most circumstances, as
